Overview

CPT: Pharmacometrics & Systems Pharmacology (PSP) is an official open access journal of the American Society for Clinical Pharmacology and Therapeutics (ASCP) and International Society of Pharmacometrics (ISoP).

CPT: Pharmacometrics & Systems Pharmacology is a cross-disciplinary journal devoted to publishing advances in quantitative (e.g., modeling and simulation) methods as applied in pharmacology, physiology and therapeutics in humans. The journal welcomes original research articles, reviews and tutorials that bridge the following areas: pharmacometrics, modeling and simulation as applied to the design and evaluation of clinical trials, systems pharmacology modeling, particularly with a mechanistic link to human (patho)physiology, disease modeling, "population" or mixed-effects pharmacokinetics and pharmacodynamics (PKPD) modeling, modeling and simulation to support translational research, physiologically-based pharmacokinetics (PBPK), model-based meta-analyses of clinical trials, mechanism-based pharmacokinetic-pharmacodynamic modeling, computational pharmacology, bioinformatics, comparative efficacy, effectiveness and cost-effectiveness. Systems pharmacology may involve the application of systems biology approaches to study drug activities, targets and effects. The discipline is often defined with reference to engineering and pharmacological principles as the quantitative analysis of the dynamic interactions between drugs and a biologic system that aims to understand the behavior of the system as a whole. The common focus will be on quantitative methods that improve our understanding of pharmacology and therapeutics in humans.

Society Information

The American Society for Clinical Pharmacology and Therapeutics (ASCPT) was founded in 1900, and consists of over 2,200 professionals whose primary interest is to advance the science and practice of clinical pharmacology and translational medicine for the therapeutic benefit of patients and society. ASCPT is the largest scientific and professional organization serving the disciplines of Clinical Pharmacology and Translational Medicine.

All articles published in this journal are freely available to read, download, and share. Articles are published under the terms of the Creative Commons Attribution Non-Commercial License which permits use, distribution, and reproduction in any medium, provided the original work is properly cited and is not used for commercial purposes.

Publisher

CPT: Pharmacometrics & Systems Pharmacology is published by Wiley Periodicals, Inc., 101 Station Landing, Suite 300, Medford, MA 02155; Telephone: 781-388-8200; Fax: 781-388-8210.

CPT: Pharmacometrics & Systems Pharmacology

PERSPECTIVES

- 357** Improving Interpretation of New and Old Serum Biomarkers of Drug-Induced Liver Injury Through Mechanistic Modeling
Paul B. Watkins

TUTORIAL

- 360** Confidence and Prediction Intervals for Pharmacometric Models
Anne Kümmel, Peter L. Bonate, Jasper Dingemanse, and Andreas Krause

RESEARCH

- 374** First-Pass CYP3A-Mediated Metabolism of Midazolam in the Gut Wall and Liver in Preterm Neonates
Janneke M. Brussee, Huixin Yu, Elke H. J. Krekels, Berend de Roos, Margreke J. E. Brill, Johannes N. van den Anker, Amin Rostami-Hodjegan, Saskia N. de Wildt, and Catherijne A. J. Knibbe
- 384** Modeling of the Weight Status and Risk of Nonalcoholic Fatty Liver Disease in Elderly Individuals: The Potential Impact of the Disulfide Bond-Forming Oxidoreductase A-Like Protein (*DsbA-L*) Polymorphism on the Weight Status
Kentarō Oniki, Takehisa Watanabe, Miku Kudo, Tomoko Izuka, Tatsumasa Ono, Kazuki Matsuda, Yuki Sakamoto, Katsuya Nagaoka, Tadashi Imafuku, Yu Ishima, Hiroshi Watanabe, Toru Maruyama, Koji Otake, Yasuhiro Ogata, and Junji Saruwatari
- 394** Systems Toxicology Approach to Identifying Paracetamol Overdose
Chantelle L. Mason, Joseph Leedale, Sotiris Tasoulis, Ian Jarman, Daniel J. Antoine, and Steven D. Webb
- 404** Quantitative Systems Pharmacology Model of hUGT1A1-modRNA Encoding for the UGT1A1 Enzyme to Treat Crigler-Najjar Syndrome Type 1
Joshua F. Apgar, Jian-Ping Tang, Pratap Singh, Nanda Balasubramanian, John Burke, Michael R. Hodges, Melissa A. Lasaro, Lin Lin, Bjorn L. Miliard, Kristi Moore, Lucy S. Jun, Susan Sobolov, Anna Katharina Wilkins, and Xiang Gao
- 413** ERRATUM: Cloud Computing for Pharmacometrics: Using AWS, NONMEM, PsN, Grid Engine, and Sonic
S Sanduja, P Jewell, E Aron, and N Pharai
